WATER & SEWER SERVICES

Is Your Freeze Protection On??

Heat Tape, Aquaflows and Circulating Pumps all help to protect water services from freezing. A number of freeze-ups have occurred already this winter due to freeze protections not being on. This may cause damage to the service and may require the service to be repaired or replaced - a replacement can cost upwards of \$10,000.

It's the responsibility of the homeowner to make sure their freeze protection is working. Replacement due to negligence will not be covered under the Service Connection Failure Assistance Program.

Homeowners should check to make sure that one or more of the following is working: Heat Tape - is it on?; Aquaflow - is it working?; or Circulating Pump - is it on?

In the case of power outages, it may be prudent to turn a tap on (slow trickle) and flush your toilets periodically to allow water to flow, and prevent the service from freezing.

SOLID WASTE FEEDBACK

Residents are reminded that the Solid Waste Management presentation given December 10, 2003 can be found on the City website on the Public Works page. The City welcomes any comments, questions or feedback on the options included in the presentation, and requests that comments be submitted to the Environmental Coordinator before January 31.
