### **Yellowknife Fire Chief Advises Residents to Stay Off the Ice**

Yellowknife, NT -

Yellowknife Fire Chief Darcy Hernblad is advising the public to stay off the ice. The ice is just forming and is not thick enough to safely support the weight of an individual. The Yellowknife Fire Division will be checking ice thickness and will advise the public when the ice is 6” thick in the test areas and will be posting ice measurements to the City’s website. Until that time, **STAY OFF THE ICE.**

For further information, please contact the Yellowknife Fire Division at 766-5500.
