Historical Assessment and Taxation Data

March 2022

Historical Data

Historical assessment and taxation values, percentages, and mill rates by property class for the years 2000 through 2021 are shown in Appendix A.

Historical Summaries

Chart I shows the composition of the assessment base between 2000 and 2021 in the context of Non-Residential and Residential¹ property groupings. It also shows the relative taxation contribution of each group over the same time period.

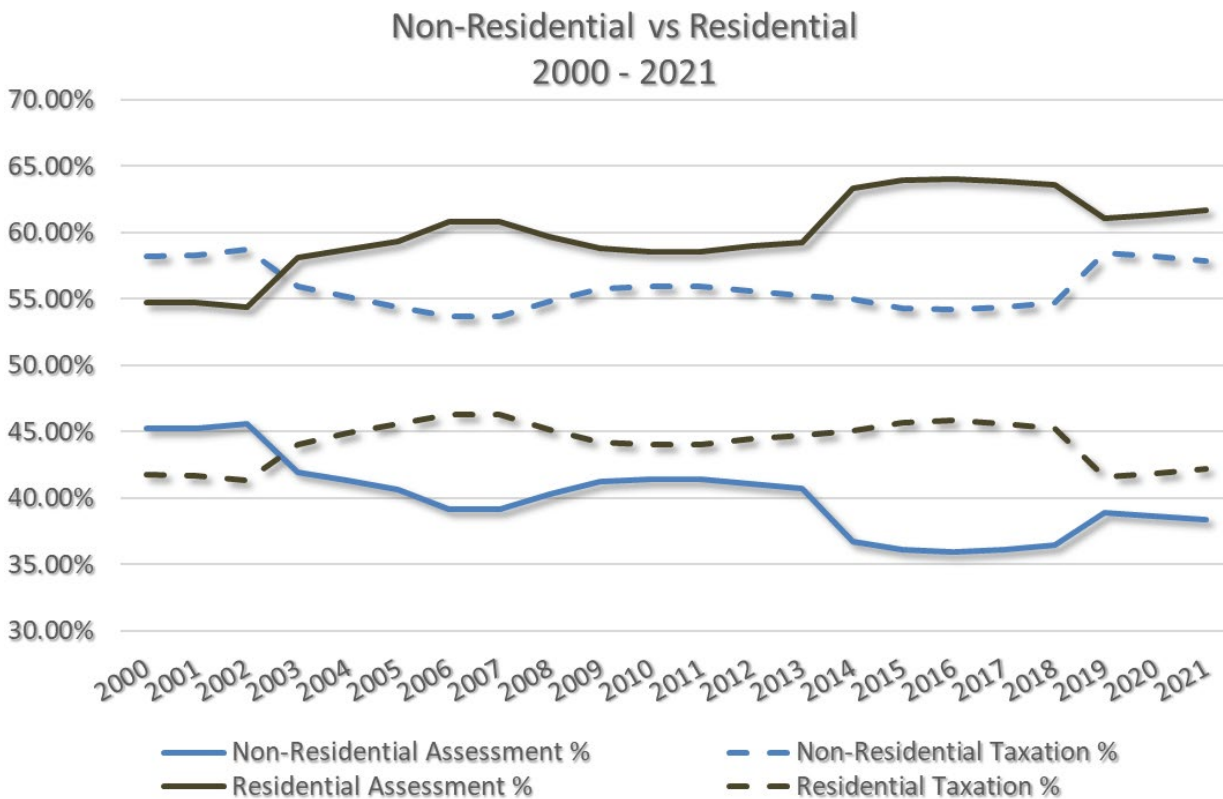

Chart I: Assessment Base and Taxation Contributions 2000 - 2021

The solid blue line shows the percentage of the assessment base made up by Non-Residential properties each year, while the dashed blue line shows the percentage of taxes contributed by the owners of those Non-

¹ The Non-Residential group is composed of all Commercial and Industrial, Mining and Quarrying, and High-Density Parking classes. The Residential group is composed of all Residential, Multi-Residential, and Agricultural classes.

Residential properties. The black lines show the same information for Residential properties. As expected, the percentage of taxes contributed by each group is closely correlated to its proportion of the assessment base.

Chart II shows the mathematical ratio of the Commercial mill rate to the Residential mill rate for each year from 2000 to 2021.

Chart II: Commercial : Residential Mill Rate Ratio 2000 - 2021

The relative property tax contributions associated with the above mill rate ratios are shown in Chart III; they have remained relatively constant over the past two decades.

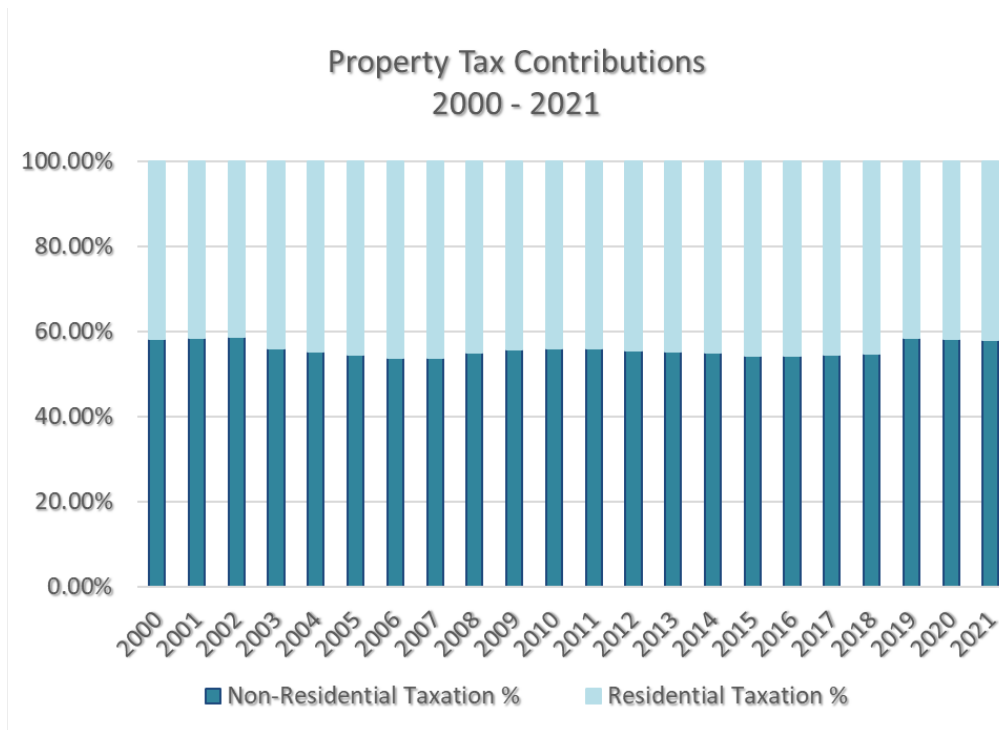

Chart II: Relative Property Tax Contributions 2000 - 2021
