

## Spotlight on Music

*Honky Tonk Angels* features three of country music's greatest female artists of all time – Loretta Lynn, Dolly Parton, and Tammy Wynette. All have been called the queen of country music but who is? Let's take a look at this CD and see if we can figure it out!

These three ladies have very distinctive voices and when you hear them you instantly know who is singing. Still, their voices blend beautifully together on the songs contained on this CD. Each lady has a beautiful vocal instrument and collectively have written some of the most timeless, thought provoking songs in music. Pretty even playing field so far as to who may be the queen of country music. However, some may say Dolly edges them out when it comes to playing multiple musical instruments.

This album features some of the best songs in country music: *It wasn't God who Made Honky Tonk Angels*, *Silver Threads and Golden Needles*, *Wings of a Dove*, and *Lovesick Blues*, the last of which has special guest Patsy Cline featured (my queen of country music!) There is something about the combination of Cline's hauntingly beautiful voice and the wonderfully written songs that still makes her very special not only to country music but music in general.

Drop by the library to borrow this CD or their greatest hits albums and find out your true queen of country music!
